Microperforated Cloud System

MicroCloud

Microperforated Cloud System

Given the success and demand for our perforated products, RealAcoustix now offers select cloud models with microperf veneered or painted finishes. This adds a high NRC value to the already superior reflective performance of the WaveMC, WavePM and WaveFM series of clouds.

Contact our team to discuss your design requirements.

FIRE RATING

ASTM E84 Class A fire-rated

NRC

.90 (4" absorption in rear)

SIZE

- Available in sizes up to 48" x 120"
- 55mm or 1mm perforations
